meal a day, and take advantage  
of the reduced housework to give your arm a rest.  
On the plane I read B. L. to Daughter by  
Marquand. I liked it though like so many of the  
writers these days their portrayal of new Dances is  
much inferior to the rest of their writing. None the less  
I think you would enjoy it should you run out of  
reading material.

Good Lord - how far behind in living standards  
are all these countries compared to U. S. We  
don't have ~~something~~ some of the good things  
they have - but even those good things ~~are~~  
largely consist of the simple living improved  
by backward industrial development. To get  
some idea of the felt power, wealth and respect  
in which the U. S. is held regarded it is necessary to  
travel to Central and S. America.

We have over disappointment in that but  
I think we would find a prolonged stay  
in most of these Latin American areas very  
different. Mexico City might be an exception  
if one knew Spanish well enough to carry on a  
good conversation. Spanish is not difficult. See  
I wish you read it instead of German. I think I'd  
advise the kids to study. Take a course in  
if they really are. After all the people of our  
country speak it. You could pick it up  
in two months I'm convinced.  
Maybe when I get to Chile there will be  
a letter from you. With love  
Henry

HOTEL DE CORTES  
AV. HIDALGO NUMERO 85  
MEXICO, D. F.

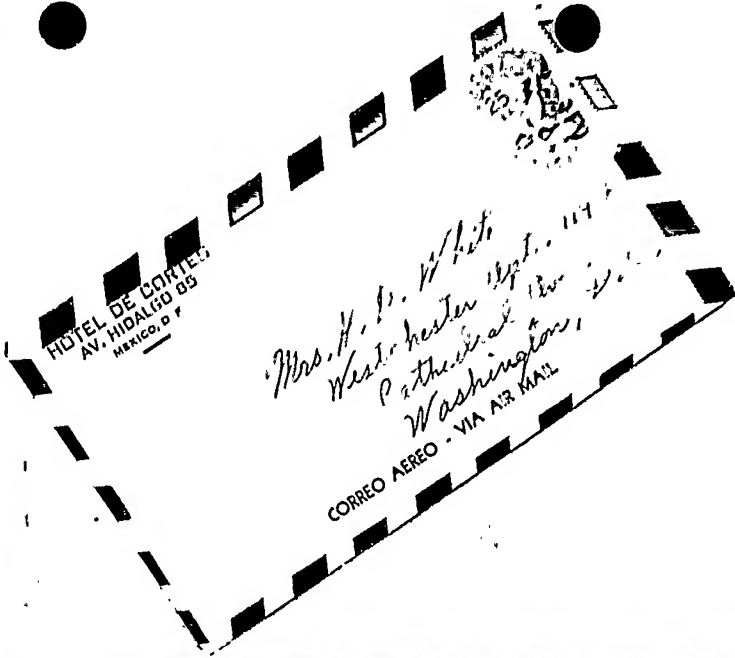

Sat. night

Anne dearest,

Arrived to-day after a rather long night sitting up. We flew most of Mexico City over the clouds so I could not see much, but the city itself was in full view - in a sort of flat saucer surrounded by fairly high hills or small mountains. Its so interesting to come to a foreign city with its slow tempo, the variety of people dressed in such a variety of simple garbs, so ranging from good clothes almost a la N.Y. to the simplest of cotton old dresses, old overalls and no shoes. The shops, too, are so hand-me-down (except of course in the main shopping center) and the contents a mixture of cheap 5 & 10 cent stuff to interesting hand wrought iron work, beads and gadgets. Mr. Gomez met me at the station and

2-12-47

after washing up at this quaint hotel - right on a steaming square in the small business section but very near the Bank of Mexico (The building is a couple of hundred yrs old but the plumbing is new) we had a late lunch or early dinner at his home. Mrs. Gomez asked much after you. She was very hospitable. In the <sup>later</sup> evening they went to dinner with us as my guests and toured the city. There has been no chance to discuss monetary problems of Mexico yet. Incidentally the Gomez have a very darling baby 15 mos. old. They have been married some 25 years I think and this is their first! She claims she has to work fairly hard despite a nurse for the child, a cook, and a maid. Mrs. G. says they all so terribly inefficient.

They are going to take me to a full flight tomorrow though I warned them I shall root for the bulls. I think we shall leave for Costa Rica on Tuesday but something depends on whether we are able to cover enough economic discussions by then.

I feel good and am drinking beer and co-cola galore. The weather is perfect and I'm glad to be here for a few days. There is no doubt but that you must soon spend a few weeks in Mexico. I know you will love it. Love Dad.

Fri. afternoon

3/7/88 \$8078/500

Well, Anne dear, there are doubtless  
hotter places than this in the world, but  
I haven't been in them. I arrived this  
noon by plane from Costa Rica, and I'd grab  
the first one out were it not for the negotiations  
to be conducted. We meet the monetary  
authorities for a long session in the late  
afternoon and another one, <sup>will be held tomorrow</sup> in the morning.  
We have a scheduled meeting with the  
President of this beautiful Republic tomorrow  
and leave for Guatemala as soon thereafter  
as possible - Sunday A.M., I believe. From there  
to Mexico City where I hope to crystallize  
some exploratory discussions. They were too  
vague up to now to draw any conclusions. I must  
be in Panama on Wed. to meet Santos-Feller.  
We both then go to Equador and then Bolivia.

Our visit in Costa Rica was more successful  
than I had hoped for, ~~and~~ and fully  
justified my position before the Board and ~~and~~  
my trip here. ~~It was~~ <sup>was</sup> met by an imposing delegation

domed, costumed, and show the country side.  
Costa Rica is beautiful and the climate and weather  
perfect this time of the year. From May to Dec.  
I believe it rains buckets every day. You and I  
must visit this country and spend about a week  
there. Beautiful city, scenery, coffee plantations  
everywhere, and a damn an unusually clean but  
uninteresting capital.

I'll give you an interesting account of our  
negotiations some day, but suffice to say we had  
complete success in achieving our objective. We  
had a long talk with the President of the country  
and altogether got what we wanted. It would  
have been impossible to have got such results  
without a few conferences on the ground.

I've been well though the days are  
 hectic. I do not have any time to myself  
except on the plane while not talking with  
Gomez. I'll doubtless be tired before I'm through  
but I'll sure ~~have~~ learn a good deal about  
the financial and monetary problems of these countries.  
Incidentally, I give them some damn good advice -  
and they recognize it as such.

It seems that I've been away for so long already.  
I want to hear from you so I'll call you up from  
Mexico - probably Tuesday late afternoon or Wed. early morning.  
Be sure to go to that doctor about treatments for your arm.  
With love, Dad.
